## Laughton Wall Light

### INSTRUCTION MANUAL

#### Safety Warnings

- Do not plug into the mains until your lamp is fully assembled.
- This product is only suitable for connection to 240V~50Hz supply, indoor use only and is *not* suitable for a Bathroom location.
- This fitting is a Class I, Earthed product, and must be connected to Earth.
- If you are in any doubt about your competence please consult a qualified electrician.
- Clean with a dry cloth only. Do not use liquid or abrasive cleaners on this product, and allow 10 minutes to cool before replacing adjusting or cleaning.
- If any modification is made it will invalidate the warranty and may render the product unsafe.

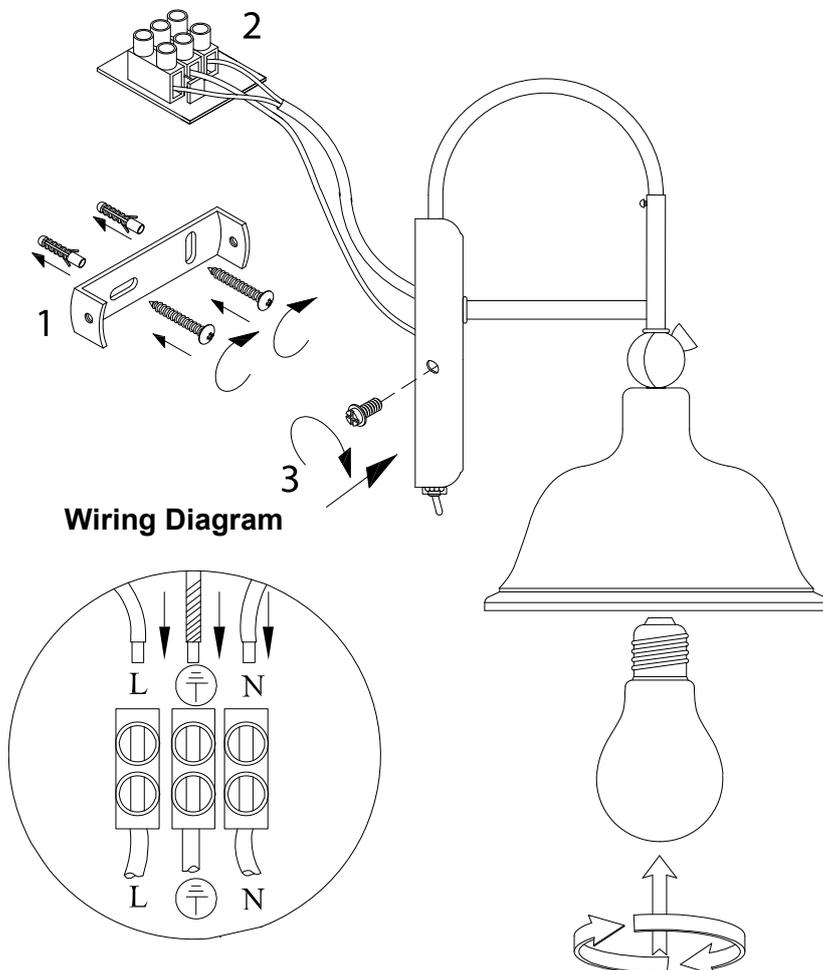

#### Assembly/ User Instructions

### Before you start

Please read these instructions carefully before fitting and retain for reference. Check the packaging and make sure that you have all the required parts. Follow each assembly step in order to prevent incorrect assembly. Ensure that the product is fully assembled as illustrated before use.

#### The Light pack contains:

Light fitting

1. Decide on the position of your light fitting. Ensure there is a solid mounting surface, preferably a brick or block wall and ensure that there are no cables or pipes beneath the surface. If the wall is timber frame and plasterboard then please use appropriate fixings. Ensure the fixings used can support the weight of the wall light.
2. Remove the fixing bracket, by undoing the 2 bracket screws (3), retain these for re-use.
3. Use the fixing bracket (1) as a template to mark the screw holes. Make sure the bracket is horizontal. Fix the bracket to the wall.
4. Support your fitting and connect the house wiring to the terminal block (2). **NOTE: This is a Class I fitting and must be earthed.** See wiring diagram for more details.
5. Re-position the fitting over the wall bracket and secure with the two back plate / bracket screws, removed in Point 2 above. Make sure that all the internal cables and connections are inside the back plate taking care not to trap or strain the internal cables.
6. Fit the bulb, being careful not to touch it with your bare hands - use a cloth or gloves. **NOTE: Never fit bulbs of a higher wattage than those specified on the label (as these may cause overheating and damage the fitting).**
7. Turn on the power and test.
